

## Essential Skills – Lesson 25

Today we want to introduce GitHub to store your programs and projects as a portfolio. **GitHub** is a distributed version-control platform where users can collaborate on code projects, fork code, share ideas and more.

Start with a quick video that shows how GitHub can be used in the real world.

<https://www.youtube.com/watch?v=w3jLJU7DT5E&t=20s>

Look at the following video on using GitHub for a student portfolio.

<https://www.youtube.com/watch?v=PQsJR8ci3J0>

**Set up** a GitHub account and practice a few of the options identified in the video. Create a repository and add some files to the repository. We will look at these options in class.

See you at 10.
